

# EXTREMA Paris new Mobile App (Android & iOS)

Available from GooglePlay and AppStore

Android: <https://play.google.com/store/apps/details?id=com.phonegap.extremaparis>

iOS: <https://apps.apple.com/am/app/extrema-paris/id1403333206>

EXTREMA Paris is a specifically informed version of EXTREMA Europe in order to meet the complex needs of the city of Paris, exclusively developed and distributed by ARATOS Systems.

Given the growing concerns related to global heating, EXTREMA Paris is specifically designed to assess the risk of heat-related hazards (i.e heatstroke, faint, etc.) for each individual user.

EXTREMA Paris has the capacity to provide suggestions on how to respond to high temperatures while, at the same time, can instantly map out the coolest routes to the users' destination. With a real-time update system based on city-specific satellite data, EXTREMA Paris can identify the areas most affected by heat and provide a personalized assessment along with recommendations to reduce the risk.

EXTREMA Paris comes with a brand new UI design and new navigation through the app while allowing the user to rate the registered cooling centers and read other users' experiences and feedback prior to their visit.

## Features of new EXTREMA Paris:

- New user interface and new navigation through the app
- Your risk: Personalized risk related to heat for your location and recommendations on measures to reduce your risk.
- Cooling centers: information, opening hours, rating of all the cooling centers in Paris.
- Cool routes: Find the best route to go anywhere in Paris either through cooling centers or through the currently coolest roads.
- Multiple Profiles: allows you to create different user profiles. Very useful when you want to check the risks of heat for your loved ones and the elderly around you, enter their profile and their location and get the assessment of their risk related to heat.

EXTREMA is a service of the 100 Resilient Cities Network ([www.100resilientcities.org](http://www.100resilientcities.org), founded by the Rockefeller Foundation).
