Description

Where to find coolness today in Paris?

Do you know that depending on where you are, you could be more impacted by the heat?

Would you like information on the cool places closest to you?

With a real-time update system based on city-specific satellite data, models and data, the EXTREMA Paris mobile app identifies areas of the city that are most affected by heat. in real time. The City of Paris has studied the problem of high temperatures on its territory and offers with this application nearly 1,000 islands of freshness available to the public in order to cool off in case of heat wave! The mobile app assesses your custom risk related to heat in real time based on your location, and if it is high, alerts you. It also provides recommendations on how to respond to high temperatures in Paris and informs you about the cool places around you.

Features of EXTREMA Paris:

- Your risk: Personalized risk related to heat for your location and recommendations on measures to reduce your risk.
- Cool islands: information, opening hours and directions to the cool places closest to your location.
- Multiple Profiles: allows you to create different user profiles. Very useful when you want to check the risks of heat for your loved ones and the elderly around you, enter their profile and their location and get the assessment of their risk related to heat.
